

RYAN CARRICO

Senior Audio Restoration Specialist | Signal Quality SME Sunnyvale, CA |
rcsubd@protonmail.com | 408-393-0715

PROFESSIONAL SUMMARY

Senior Audio Engineer with 35+ years of domain expertise in high-precision spectral restoration, signal chain architecture, and auditory data audit. Specialist in "pre-production" cleaning—stripping clicks, pops, and artifacts from raw audio to ensure high-fidelity inputs for AI voice models and professional dubbing. Expert in SpectraLayers and DAW environments.

TECHNICAL SKILLS

- Spectral Restoration: Master-level cleaning of clicks, pops, background noise, and digital artifacts.
- DAW Ecosystems: Pro Tools, Cubase, Logic Pro, Audacity, Ableton Live.
- Audio Quality Audit: High-precision identification of "bad digital" characteristics and level-matching for speech.
- Workflow Optimization: Designing 1,000+ track templates and managing complex signal routing.

EXPERIENCE

Technical Audio Specialist & Restoration Architect | 2020 – Present

- Audio Pre-Production: Specialized in cleaning and preparing vocal tracks for high-end digital projects, ensuring optimal clarity before processing.
- Signal Quality Audit: Acted as a "technical critic" for audio datasets, identifying systemic failure points and auditory inaccuracies.
- SpectraLayers Mastery: Utilized spectral editing to isolate and remove non-harmonic noise without damaging the core vocal characteristics.

Technical CSR & Hardware Triage | 1999 – 2007 | The Good Guys

- Hardware Triage: Handled technical diagnostics for high-end audio/visual hardware, identifying defects and routing warranty claims based on deep technical specs.
