Subject Matter Expert: Audio Systems & AI Evaluation Sunnyvale, CA | 408-393-0715

rsubd@protonmail.com

PROFESSIONAL SUMMARY

Audio Engineering SME with 25+ years of domain expertise in digital audio workstation (DAW) architecture and high-precision systems analysis. Specialized in audio data annotation, signal processing, and quality evaluation. Proven capability in identifying "bad digital" artifacts and optimizing complex software-hardware signal chains.

TECHNICAL SKILLS & TOOLS

- DAW Proficiency: Extensive experience with Pro Tools, Logic Pro, Nuendo, and Reason.
- Audio Data & Quality: Audio data labeling, annotation, metadata review, and quality evaluation.
- Audio Restoration: Experience using iZotope RX and Steinberg SpectraLayers for spectral editing, noise reduction, and detailed audio cleanup.
- Systems Architecture: Mastery of signal routing, VST/AU infrastructure, and MIDI workflow optimization.

EXPERIENCE

Technical Audio Specialist & Workflow Architect | 2020 – Present

- Audio Quality Analysis: Evaluated audio software and recorded material, identifying technical problems, systemic failure points, and "bad digital" artifacts.
- Template Design: Developed 1,000+ track hybrid orchestral templates, managing high-track-count signal routing and software stability.
- Annotation & Labeling: Applied detailed labels and descriptive judgments to sound clips, voice recordings, and other audio elements.
- Systems Stress-Testing: Tested audio software environments under high workloads to evaluate stability, signal routing, and auditory accuracy.

Warehouse & Asset Protection Specialist | 2018 – 2020 | Best Buy

- Operational Audit: Managed high-volume logistics and security protocols, conducting risk assessments and inventory audits to maintain system integrity.

Technical CSR & Triage Professional | 1999 – 2007 | The Good Guys

- Hardware Triage: Handled technical triage for audio/visual hardware, identifying defects and routing warranty claims based on technical specifications.
