RYAN CARRICO
Audio Engineering & Post-Production Lead | Audio Systems SME
Sunnyvale, CA | rcsubd@protonmail.com | 408-393-0715

PROFESSIONAL SUMMARY

Audio engineer with 25+ years of experience in production, restoration, editing, mixing, mastering, studio construction, and complex signal routing. Skilled at cleaning vocal material, removing clicks, pops, noise, and other artifacts, and preserving the natural character of a voice or performance. Experienced with Nuendo, Logic Pro, Cubase, Reaper, Pro Tools, Ableton Live, Reason, Wavelab Pro, and SpectraLayers. Brings hands-on production leadership, technical troubleshooting, and a high standard for finished audio.

TECHNICAL SKILLS

● DAWs: Pro Tools, Logic Pro, Cubase, Reaper, Ableton Live, Reason, Nuendo
● Audio restoration: Spectral editing, noise reduction, click and pop removal, artifact detection, and preservation of vocal character
● Mixing and mastering: Signal integrity, level matching, workflow optimization, and high-precision quality review
● Audio systems: Complex signal routing, VST/AU infrastructure, MIDI workflow optimization, and 1,000+ track templates
● Production leadership: Team scheduling, equipment troubleshooting, facility setup, quality control, fulfillment, and distribution

EXPERIENCE

Technical Audio Specialist & Workflow Architect | Freelance Technical Audio | 2020 – Present
● Cleaned and prepared vocal and other audio material, including audio-to-video alignment in Nuendo and detailed review for unwanted noise, clicks, pops, and other artifacts.
● Developed 1,000+ track hybrid orchestral templates and managed complex signal routing and software stability.
● Stress-tested audio software environments and troubleshot problems affecting high-load performance and auditory accuracy.
● Used spectral editing to isolate unwanted sound without damaging the core character of a vocal or performance.

Facilities Manager / Production Operations Lead | W.E.T. Solutions LLC | Santa Clara, CA | 2001 – 2004
● Helped establish and operate a bottled-water production facility, including a city-water connection, UV filtration, a clean room built from scratch with UV and HEPA air filtration, and repair of a used filling and labeling line.
● Supervised a five-person crew, set schedules and breaks, and coordinated production, cleaning, order fulfillment, palletizing, wrapping, forklift loading, and distributor deliveries.

● Tested competing bottled waters for total dissolved solids (TDS), maintained comparative quality records against product claims, and cleaned and sanitized the main tank weekly under city and federal requirements.

Warehouse & Asset Protection Specialist | Best Buy | 2018 – 2020
● Managed receiving, inventory checks, cycle counts, stocking, customer pickups, shipping logistics, and technical hardware issues while maintaining accurate records.

Technical CSR & Hardware Triage | The Good Guys | 1999 – 2007
● Diagnosed audio/visual hardware problems, documented defects, and routed warranty repairs according to technical specifications.
